

MODEL: (RHFE951, 952, 950X / EVOLVE)

STONE LOCATION GUIDE

Please note: Shadow effect on front section of the burner makes the front two rows of stones appear lighter—all stones are a similar grey colour

Ensure that the ceramic panels are pushed hard to the side and rear

Place the granules evenly around and in the gaps between the stones. DO NOT place the granules near the flame rods or the pilot (circled area above) as this will cause blockages in the appliance.

MODEL: (RHFE951, 952, 950X / EVOLVE)

LOG LOCATION GUIDE

Ensure that the Ceramic Panels are pushed hard to the Side and Rear

Place the granules evenly around and in the gaps between the logs. DO NOT place the granules near the flame rods or the pilot (circled area above) as this will cause blockages in the appliance.
